

CS 361 Project B, Weekly Update

MEETING 1:

Location: Google Hangouts

Date/Time: 21 July 2015 7:15pm PDT

Tasks Completed This Week, and Progress Made

- Drafted user stories
- Sent drafted stories to Adam McDaniel (customer) to prioritize and clarify/edit as needed
- Estimated effort units
- Added all team members to shared GitHub repository

Problems Currently Faced

- awaiting clarification from Adam McDaniel regarding prioritization of user stories

Plans and Goals for coming week and important due dates

- will divide into teams once clarification from Adam McDaniel received
-

MEETING 2

Location: Google Hangouts

Date/Time: 23 July 2015 7:15pm PDT

Tasks Completed This Week, and Progress Made

- Established a Friday-Friday cycle
- User stories prioritized by customer
- Draft of first XP iteration started
- Group divided into pairs based on strengths and weakness in required web technologies
- User stories assigned to pairs for first iteration
- Bootstrap skeleton set up and disseminated to partners to ensure consistency in appearance
- SQL create table query created to ensure consistency of data during testing and coding
- Partners have initiated pair programming
 - Kelvin and Kendra have completed unit testing and coding for User Story 1 on July 24th.
 - Kelvin and Josh are investigating the photo upload feature and how best to integrate it into the overall system. Added the file upload form field to the add food form.
 - Components have been pushed to GitHub and shared with the team for acceptance testing.
 - Josh and Eric have written a SQL command to remove expired food items and are moving on to User Story 4.

Problems Currently Faced

- Still somewhat unclear what to unit test for User Story 1 as there is only a prepared statement and date calculations

Plans and Goals for coming week and important due dates

- Will schedule a second meeting for sometime early next week (27 or 28th)
